Micro Figure w/ Six S4 Ports

\$90.54

The Micro Figure S4 Keyboard Platform combines all the standard Micro 20 features with the System 4 Port options. The System 4 option allow users to customize their workstation and create a unique, universal platform with multiple accessories. These accessories can be plugged into each of the four corners of the platform and placed into different positions, accomodating a mouse, writing, documents, calculators, and peripherals. Add, remove and rearrange on-the-fly - no tools required!

The Micro Figure S4 features gel wrist/forearm supports that help guide the placement of the wrists, and non-skid pads to prevent the keyboard from slipping and moving around. The Micro Figure Keyboard Platform is designed to bring the work surface closer to the user's optimal work zone. This keyboard tray when combined with any of the optional accessories provides a truely universal keyboard platform with virtually unlimited options and uses.

The Micro Figure S4 Keyboard Platform can also be customized to use our System 2 and/or System 6 port options. Each of the port options 2, 4, and 6, offer the respective number of ports on the underside of the platform.

This board includes six (6) open S4 Ports, click "Custom System" to add S4 accessories.
