Versa 5

\$97.68

The Task 2 Versa 5 mechanism provides extended clearance for ease of use and optimal comfort. Designed to have infinite height and tilt adjustments, the Versa 5 is an accommodating mechanism and works with any workstation. Can be adjusted 6.25 inches in total.

The Task 2 Versa 5 offers independent tilt control featuring a soft-touch knob with 15 degrees positive and negative adjustment. Its spring-assisted lift and lock system allows users to effortlessly move platforms up and down to their optimal height, providing fast and reliable height adjustment - without all the hassles! It utilizes a 5 inch neck providing users optimal clearance, a low-profile design, and an extended arm ideal for corner applications. The Task 2 Versa 5 swivels a full 360 degrees for effortless positioning and convenient storage.
