Dial@Tilt Articulating Keyboard Mechanism

\$142.66

The Task 2 Dial @ Tilt mechanism has revolutionized the keyboard platform industry with its award-winning design! It is the latest generation in articulating keyboard mechanisms, designed with the human factor in mind! With its easy to read tilt reference, ease of dialing this keyboard arm offers unprecedented smoothness and adjustability for maximum comfort.

The Task 2 Dial @ Tilt offers many features for optimal performance and comfort! Fully independent height and tilt adjustment. Its superior tilt range with easy to read tilt reference makes it accommodating and easy to use at any workstation. The Task 2 Dial @ Tilt offers full range positive and negative tilt with only 4.5 revolutions of dial covering the entire tilt range from -15 degrees to +10 degrees. Optional positive tilt lockout feature available. Uses list and lock system for fast and reliable height adjustment. The Task 2 Dial @ Tilt swivels a full 360 degrees for effortless positioning and convenient storage.
