Cobra Sit-Stand Mechanism

\$152.55

The spring-assisted Cobra needs no adjustment knobs or levers to change keyboard height. Simply lift the keyboard to its desired position and release. The arm's internal mechanism instantly locks at any desired height throughout the impressive 12.5" travel range. Sit, stand, or work anywhere in between. The Cobra has an independent, +10/-20 degree keyboard tilt feature to achieve preferred ergonomic typing positions. Simply release the tilt control lock, find a comfortable position, and secure lock.

Features

Counterbalance spring helps offset keyboard weight during height adjustments.

12.5" total height adjustment range (7" up; 5.5" down).

No knob, lever, or ratchet handle required to set height, lift to desired position and release.

Separate control for locking independent tilt adjustment, +10/-20 degrees.

23" track included.

Rugged steel construction finished in a durable black textured powder coat.

Exceeds ANSI / BIFMA X5.5 1998 Industry Standard.

All mounting hardware and instructions included.
